Re: *MidAmerican Central California Transco, LLC* Docket No. ER14-1661-____ Annual Transmission Formula Rate True-Up Adjustment (Informational Filing)

Dear Ms. Bose:

MidAmerican Central California Transco, LLC ("MCCT") hereby submits for informational purposes its annual true-up adjustment ("True-Up Adjustment") for its transmission formula rate in accordance with its Formula Rate Implementation Protocols ("Protocols") set forth in Attachment IV of MCCT's California Independent System Operator Corporation ("CAISO") Transmission Owner Tariff.¹ Section 2 of the Protocols requires MCCT to annually calculate the true-up of its formula rate on or before June 30th and cause it to be posted and filed with the Federal Energy Regulatory Commission ("Commission") for informational purposes. As provided in section 3 of the Protocols, this True-Up Adjustment does not require any Commission action.

I. Background

MCCT is a wholly owned indirect subsidiary of BHE U.S. Transmission, LLC organized under the laws of Delaware. MCCT was formed to construct, finance, own, operate and maintain new high-voltage electric transmission facilities in California, and is an approved project sponsor for the Central Valley Power Connect ("Project") eligible to recover its costs through the CAISO Transmission Access Charge ("TAC"). MCCT's Formula Rate Template and Protocols appear as Appendix III and Appendix IV of its CAISO Transmission Owner Tariff, respectively.

¹ The MCCT CAISO Transmission Owner Tariff was accepted for filing in Docket No. ER14-1661-000. *MidAmerican Transco Cent. Cal. Transco, LLC*, 147 FERC ¶ 61,179 (2014), *order on settlement*, 151 FERC ¶ 61,251 (2015).

CAISO originally approved the Project in its 2012/2013 Transmission Plan as necessary for reliability in 2022.² MCCT and the Project's other developers promptly began development activities. MCCT stopped development activities and placed the Project in deferred status as of March 2017 after CAISO placed the Project on hold in the 2016-2017 transmission planning process.³ MCCT began the project cancellation process after CAISO formally cancelled the Project in March 2019.⁴ The Commission accepted MCCT filings providing for recovery of deferred pre-commercial costs recorded in a regulatory asset prior to January 1, 2019,⁵ and recovery of abandoned plant costs for the cancelled project.⁶

II. 2021 True-Up Informational Filing

This True-Up Adjustment pertains to MCCT's transmission formula rates in effect for calendar year 2021. In accordance with the Protocols, adjustments from this True-Up Adjustment will be incorporated into the Transmission Formula Rate Annual Update to be filed by MCCT on or before September 30, 2022, for the 2023 rate year.

MCCT has included with this filing a copy of its annual true-up adjustment, which was posted to its website and served on June 30, 2022, in accordance with its Formula Rate Protocols.⁷

III. Documents Submitted with this Filing

This filing consists of the following:

- This transmittal letter;
- Appendix A which consists of the Transmission Formula Rate Annual True-Up based on 2021 actuals, including associated workpapers, in Portable Document Format (PDF);
- Appendix B which consists of the Transmission Formula Rate Annual True-Up based on 2021 actuals, including associated workpapers, in Microsoft Excel format; and

² See California ISO Board-Approved 2012-2013 Transmission Plan (Mar. 20, 2013), http://www.caiso.com/Documents/BoardApproved2012-2013TransmissionPlan.pdf.

³ See California ISO Board-Approved 2016-2017 Transmission Plan at 104 (Mar. 17, 2017), http://www.caiso.com/Documents/Board-Approved 2016-2017TransmissionPlan.pdf.

⁴ See California ISO Board-Approved 2018-2019 Transmission Plan at 131 (Mar. 29, 2019), http://www.caiso.com/Documents/ISO_BoardApproved-2018-2019_Transmission_Plan.pdf.

⁵ The Commission accepted this filing by letter order on May 14, 2019. *MidAmerican Cent. Cal. Transco, LLC*, Letter Order, Docket No. ER19-1384-000 (May 14, 2019).

⁶ The Commission accepted this filing by letter order on September 26, 2019. *MidAmerican Cent. Cal. Transco, LLC*, Letter Order, 168 FERC ¶ 61,197 (2019).

⁷ The posting is available at <u>http://www.bhetransmission.com/</u>.

• Appendix C which consists of the comparison of the 2021 Projection and the 2021 actuals, in Portable Document Format (PDF).

IV. Conclusion

This filing is for informational purposes only, and no Commission action is required. Please do not hesitate to contact the undersigned with any questions related to this filing.

Respectfully submitted,

<u>/s/ Douglas W. Smith</u> Douglas W. Smith

Counsel for MidAmerican Central California Transco, LLC

Note

Rate Formula Template Utilizing FERC Form 1 Data MidAmerican Central California Transco, LLC

For the 12 months ended 12/31/2021

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#) References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

Letter The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets Α or liabilities related to FASB 158 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note F. Account 281 is not allocated R Identified in Form 1 as being only transmission related. Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission С Prepayments are the electric related prepayments booked to Account No. 165 and reported on Pages 110-111 line 57 in the Form 1. П Line 35 excludes all Regulatory Commission Expenses itemized at 351.h, all advertising included in Account 930.1 (except safety, education or out-reach related advertising) and all FEI and FPRI due and expenses Line 42 reflects all Regulatory Commission Expenses directly related to transmission service. RTO filings, or transmission siting itemized at 351.h F Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere. Excludes other taxes associated with facilities leased to others that are charged to the lessee. The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = F "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce

rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) 0.21 FIT = Inputs Required:

SIT=

p =

0.09 (State Income Tax Rate or Composite SIT from Attachment 2) (percent of federal income tax deductible for state purposes) (percentage of ownership that is not for profit)

For each Rate Year (including both Annual Projections and True-Up Adjustments) the statutory income tax rates utilized in the Formula Rate shall reflect the weighted average rates actually in effect during the Rate Year. For example, if the statutory tax rate is 10% from January 1 through June 30, and 5% from July 1 through December 31, such rates would be weighted 181/365 and 184/365, respectively, for a non-leap year.

- G Prior to issuing any debt, the cost of debt on Attachment 5, Line 25 for the relevant year will be used. If Construction Financing (where an amount is borrowed but the funds are drawn down over the construction period) is obtained, the cost of debt is determined using the internal rate of return methodology shown on Attachment 5 until a project is placed in service, subject to true-up pursuant to Attachment 5, and the cost of debt is determined using the methodology in Attachment 2 after a project is placed in service. Attachment 5 potentials a hypothetical explored and the internal rate of return methodology; the methodology will be applied to actual amounts for use in Appendix III. If non-construction financing is obtained, the cost of debt is determined using the methodology in Attachment 2 and Attachment 5 is not used.
- н Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down. Reserved
- ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC under FPA Section 205 or 206. The return on incentive projects will be calculated on Attachments 3 and 4 and input on line 66. The capital structure shown on lines 80-83 will be 52% equity and 48% debt until project is placed into service. After the project is placed in service, the capital structure on lines 80-83 will reflect the actual capital structure. The ROE of 10.3% reflects the 9.8% negotiated Base ROE, plus 50 basis points for MCCT's commitment to become a member of the CAISO regional transmission organization ("RTO") as authorized by the Commission in MidAmerican Central California Transco, 147 FERC ¶ 61,179 at P 45 (2012).
- к Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant. Company must submit a Section 205 filing to recover the cost of abandoned plant. Any such filing to recover the cost of an abandoned plant item shall be made no later than 730 days after the date that Company formally declares such plant item abandoned
- The regulatory assets will accrue carrying costs equal to the weighted cost of capital on line 83 until the formula rate is effective as the resulting charges are assessed customers. м Any plant leased to others will be removed from Plant In Service and booked to Leased Plant, Account 104. Expenses charged to the lessee will be booked to Account No. 413 and the accumulated depreciation associated with the leased plant shall not be included above on lines 9-11
- Incentive returns are excluded from lines 5-65, but rather the incremental incentive return is calculated in Col J on Attachment 4 and included on line 66. Ν
- 0 Excludes TRBAA expenses
- Excludes costs associated with Asset Retirement Obligations (ARO) absent a subsequent filing under FPA Section 205. Р
- 0 Includes the construction loan true-up from Attachment 8 in the year after the construction loan is paid off or a project goes into service.

To be utilized until an entire project is placed in service Consistert with GAAP, the Origination Fees and Commitments Fees will be amortized using the standard Internal Rate of Return formula below. Each year, the amounts withdrwaw, the interest paid in the year, Origination Fees, Commitments Fees, and total Ioan amount will be updated on this attacht Assumes fmancing will be a 4 year Ioan with Origination Fees of \$1.7 million and a Commitments Fee of 35% on \$250,000,000. However, the actual terms, conditions, and duration of the Ioan may vary depending on such factors as market conditions and the scheduling of the project.

Notes

1 The IRR is the input to Debt Cost shown on Appendix III. line 80 during the construction period, after obtaining project financing, in accordance with Note G of Appendix III.

2. The IRR is a discount rate that makes the net present value of a series of cash flows equal to zero. The IRR equation is shown on line 6.

N is the total number of quarters the loan would be outstanding

t is each quarter

Ct is the cash flow (Table 5, Col. I in each quarter)

Alternatively the equation can be written as 0 = C0 + C1/(1+IRR) + C2/(1+IRR)2 + C3/(1+IRR)3 + ... + Cn/(1+IRR)n and solved for IRR

The Excel 1/2 formula on line 2 is : (round/XIRR/(first quarter of loan Col | of Table 5.1ast quarter of loa

The 8% in the above formula is a seed number to ensure the formula produces a positive number. 3. Line 1 reflects the loan amount, the maximum amount that can be drawn on

4. Lines 10 through 21x include the fees associated with the loan. They are estimated based on current bank condition and are updated with the actual fees

once the actual fees are known.

5. Line 23 is the LIBOR 1-month rate published on the Wall Street Journal's public site for the first business day of August during the year immediately prior to the Rate Year for the forecasted rates. The rates for the year following the Rate Year will be based on the Bloomberg Forward Curve 23 available on August 3, 2015. The rate for the Rate Year will be trued up each year to equal the average LIBOR 1-month rate published on the first business day of each month during the Rate Year. The published rates for August and the true-up are available at:

http://online.wsj.com/mdc/public/page/2_3020-libor.html (An equivalent website will be established if this website is no longer available at any time in the future). 6. Table 5, Col. C reflect the capital expenditures in each quarter

7. Table 5. Col. D reflect the amount of the loan that is drawn down in the quarter

8. Table 5. Col. G is the total fees in line 10-16 and is input in the first quarter that a portion of the loan in drawn

9. Table 5, Col. H is calculated as follows

(A x B) +C

A. Loan amount in line 1 less the amount drawn down in the prior quarter

B. Annual dollar amount fees on lines 10 through 21a divided by 4 (divided by to convert annual amounts to quarterly amounts)

C. Percentage dollar amounts divided by 1000 (applied in the quarters the payments are made) 10. The inputs shall be estimated based on the current market conditions and is subject to true up for all inputs, e.g., fees, interest rates, spread, and Table 4 once the

amounts are known. Until know, the spread shall be 2.5%

11. The interest rate in line 25 for the corresponding year is used in Appendix III, line 80 until the project financing is obtained. Thereafter the interest rate in line 2 is used

on Appendix III, line 80.

12. Prior to issuing any debt, the cost of debt on Attachment 5, Line 25 for the relevant year will be used. If Construction Financing (where an amount is borrowed but the funds are drawn down over the construction period) is obtained, the cost of debt is determined using the internal rate of return methodology shown on Attachment 5 unitil a project is placed in service, subject to true-up pursuant to Attachment 8, and the cost of debt is determined using the methodology in Attachment 2 after a project is placed in service. Attachment 5 contains a hypothetical example of the internal rate of return methodology in Mtachment 2 after a project is placed in service. Appendix III. If non-construction financing is obtained, the cost of debt is determined using the methodology in Attachment 2 and Attachment 5 is not used.

30		Transmission facility Contributions in Aid of Construction	Note 1

Note 1: In the event a Contribution in Aid of Construction (CIAC) is made for a transmission facility, the transmission depreciation rates above will be weighted based on the relative amount of underlying plant booked to the accounts shown in lines 1-11 above, and the resultant weighted average depreciation rate will be used to determine the life over which to amortize the CIAC. The life of each facility subject to a CIAC will be estimated in this manner at the time the plant is placed into service, and will not change over the life of the CIAC without FERC approval. The combined amortization expense for all CIACs shall be the sum of each individual CIAC balance amortized over the life of each individual CIAC established in this manner.

These depreciation rates will not change absent the appropriate filing at FERC.

Notes:

(1) MCCT must list ALL unfunded reserves on its books by subaccount, specifically including (but not limited to) all subaccounts for FERC Account Nos. 228.1 through 228.4. "Unfunded reserve" is defined as an accrued balance (1) created and increased by debiting an expense which is included in this formula rate (2) in advance of an anticipated expenditure related to that expense (3) that is not deposited in a restricted account (*e.g.*, set aside in an escrow account) with the earnings thereon retained within that account. Where a given reserve is only partially funded through accruals collected from customers, only the balance funded by customer collections shall serve as a rate base credit. The source of monthly balance data is company records.
